

INNOVATION & ADVANCEMENT

The mission of the Foundation is to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes.

ANNUAL REPORT 2023
THE FOUNDATION OF THE ASNR

Message from the Co-Chairs

On behalf of the Board of Trustees, it is a pleasure to report the Foundation of the American Society of Neuroradiology was able to **award \$535,000 to 9 investigators in fiscal year 2023**. Thanks to the generosity of our donors, the Foundation continues to promote the stability and growth of neuroradiology by providing critical research needed to yield expert diagnoses, target patient care, and apply sophisticated approaches to complex disease management.

Since 1987, over \$8.5 million has been awarded to fund more than 120 members of the society as research investigators. The return on your investment is substantial as the research from our neuroradiology investigators is becoming critical in this healthcare environment. **For every \$1 in Foundation grants received, investigators are able to secure an added \$20 in research funding from other sources!**

New for 2023: The Foundation partnered with the Alzheimer's Association to provide a joint grant program, the Imaging Research in Alzheimer's and Other Neurodegenerative Diseases Grant. The goal of this program is to support the development of new novel imaging tools, to advance imaging-based research, and to provide funding for novel and innovative imaging data analysis as relates to Alzheimer's and related dementia. **The program funded (3) awards at \$200,000 each.**

Additionally, The Foundation received a \$4 Million dollar gift from the estate of Elaine Berger to endow the Aldon Mark Berger Fund for Research and Education in Mental Health.

As neuroradiologists and members of ASNR, we play a vital role in fulfilling the Foundation's mission to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes. The support of our membership sends a clear message of commitment to preserve the integrity of our specialty and patient care.

Thank you for the opportunity to serve as the Co-Chairs of the Foundation and work collaboratively with a dedicated board of neuroradiologists whose vision and commitment allows us to fulfill our mission.

The success of the mission of the Foundation is inextricably tied to your commitment to the future of Neuroradiology. Please consider renewing your financial commitment to the Foundation to invest in this future.

Sincerely,

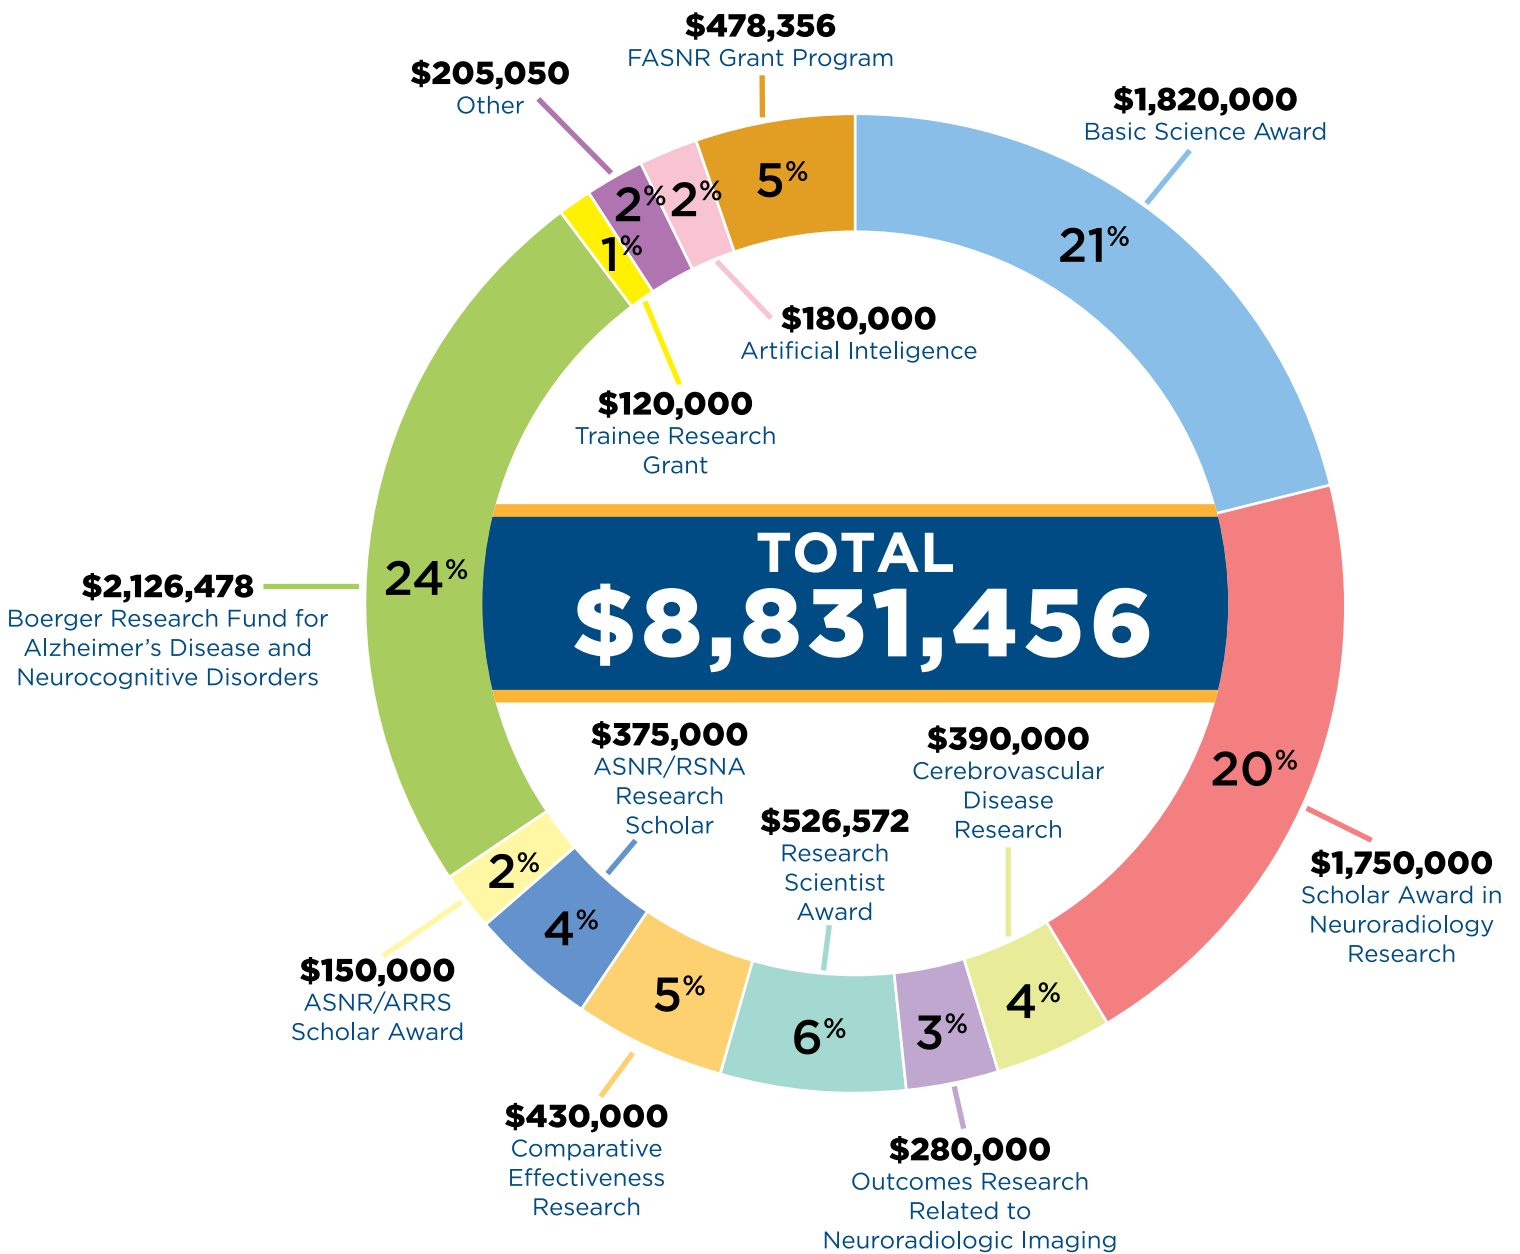

Laurie Loevner, MD
Co-Chair, The Foundation of the ASNR

Christopher Hess, MD, PhD
Co-Chair, The Foundation of the ASNR

Your Donations at Work

Research Supported 1987 to 2023

Make A Difference

The Foundation of the ASNR relies heavily on support from the neuroradiology community to further our mission to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes. Because your funds support innovative work of promising young investigators, you are building a vital pipeline of talent that will carry the field into the future.

When you make a gift to the Foundation, you send a clear message that you are committed to preserving the integrity of our specialty and that patient care is of utmost importance!

Please donate now to the Foundation of the ASNR at <https://foundation.asnr.org/page/donate/> (Remember to sign in with login and password)

Come Face to Face with some of our Investigators!

These inquisitive minds have been conducting research, some as far back as 1995. Your donations impact these and other ASNR researchers as they explore, examine, and provide the analysis that will further the discipline of neuroradiology. **For every \$1 in Foundation grants awarded, investigators are able to secure an additional \$20 in research funding from other sources.**

Donate to the Foundation of the ASNR today and support the research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes!

Foundation of the ASNR Awards

2023 Foundation of the ASNR Grant Program at \$60,000 each

Impact Statements

Peter Kamel, MD | University of Maryland

Cross-Modality Stroke Segmentation using Deep Convolutional Neural Networks for Detection of Acute Ischemic Infarcts on Non-Contrast Head CT

"I am incredibly thankful and appreciative of the Foundation of the ASNR in support of my early career. The time afforded by the grant has been instrumental in allowing me to pursue the research I am passionate about. Through the support of the grant, we have been able to perform cutting edge artificial intelligence research in stroke imaging, developing machine learning models to improve the detection and localization of early ischemic infarcts on CT by training on MRI results. The work has already led to multiple presentations, paper submissions, and grant applications with the potential to impact patient care. This would not have been possible at all without the support of the Foundation of the ASNR."

Virginia Hill, MD | Northwestern University

Augmented Intelligence Analysis of Meningioma MRIs According to DNA Methylation Subgroups, Molecular Markers, and Copy Number Variants

"I am so grateful for this FASNR grant supporting research in meningiomas, the most common primary intracranial tumor. Given two identical-appearing meningiomas, one will grow while the other will eventually kill the patient. Radiomics will be able to differentiate between aggressive and "quiet" meningiomas noninvasively. Eventually, we will be able to use the AI analysis to noninvasively predict molecular markers and DNA methylation subtypes and choose appropriate, personalized treatment that will improve patient quality of life and survival.

The FASNR grant provides essential support to early researchers. It is an investment that will pay off in future, larger projects that will fuel our endeavors to improve patient safety, make treatments more effective, and improve patients' lives."

Licia Luna, MD, PhD | Johns Hopkins School of Medicine

Investigating the Resting State Functional Connectivity and Molecular Underpinnings of the Association between Post-Traumatic Stress Disorder (PTSD) and Dementia

"My research focuses on exploring the intricate connection between cognitive dysfunction and psychiatric disorders by utilizing advanced functional MRI and molecular imaging techniques. The Research Scholar Award has provided me with the opportunity to conduct a comprehensive multimodal investigation, enabling me to uncover the molecular and functional mechanisms underlying the link between post-traumatic stress disorder and cognitive decline. This exploration lays the groundwork for developing innovative therapeutic and diagnostic approaches. With the generous support of FASNR, I am eager to continue investigating this interdisciplinary field, bridging functional MRI with molecular insights to enhance outcomes for patients with neuropsychiatric disorders. I am profoundly thankful for this opportunity and motivated to leverage our findings to secure additional funding. Your ongoing support is essential as we strive to make meaningful strides in patient care and address the challenges posed by cognitive and psychiatric conditions."

Nancy Pham, MD | Stanford University

Multi-technique MR Perfusion Evaluation of Nasopharyngeal Carcinomas: A Study Assessing the Concurrent Use of Dynamic Susceptibility Contrast-enhanced, Dynamic Contrast-enhanced, and Arterial Spin Labeling for Whole-tumor Characterization and Biomarker Discovery

"Nasopharyngeal cancer (NPC) is the second leading cause of head and neck cancer mortality worldwide. Integrating functional MR perfusion biomarkers with genomic plasma EBV-DNA and 18FDG-PET/CT metabolic parameters can potentially improve tumor staging, prognostication and surveillance beyond the traditional AJCC TNM staging system alone. The ASNR grant proved instrumental in my development as a clinician-scientist. It will support 12 months of dedicated research time, enabling me to collect crucial data for my research on NPC. This data has already directly contributed to my ability to secure additional grant funding. This early success strengthens my resolve to bridge the gap between clinical practice and scientific advancement."

Foundation of the ASNR Awards

2023 Trainee Research Grant Selections

Grants funded at \$5,000 each

Gabriel Brooks, MD

University Medical Center Hamburg
Medical School Hamburg (MSH) / Department of Neuroradiology,
HELIOS Medical Center

A multicenter study to implement an imaging biomarker for acute stroke management: deep learning-based quantification of net water uptake in the ischemic brain.

Cynthia Greene, MD, PhD

Johns Hopkins Hospital

Applying pH-sensitive amide proton transfer imaging to poststroke dementia patients in order to determine imaging biomarkers of post stroke outcomes.

Maryam Vejdani Jahromi, MD, PhD

Harvard Medical School

Machine Learning Algorithm to Detect Region of Brain Infarction based on CT Angiogram Imaging.

Dhairya Lakhani, MD

Johns Hopkins University

Novel MR fingerprinting ASL in characterization of small arteriovenous malformations (AVMs).

Boerger Research Fund for Alzheimer's Disease and Neurocognitive Disorders \$75,000

Priya Rajagopalan, MBBS, MPH

University of Southern California

Assessing Brain volumes and White matter Microstructure in Alzheimer's Disease in relation to Astrocyte and Oligodendrocyte based genetic subtypes

2023 Women in Neuroradiology Leadership Award

Nikdokht (Nicky) Farid, MD

University of California, San Diego

Thank you again for the Women in Neuroradiology Leadership Award and the opportunity to attend the RLI Summit in Boston.

I found the meeting to be highly educational and inspirational. I had an opportunity to meet and network with many academic and private practice radiologists from across the country. I am certain that the tools I learned about the business and finances of radiology, the art of negotiation, and leadership skills will be extremely useful to me in my career.

The Foundation of the American Society of Neuroradiology is the 501 (C) 3 philanthropic arm of the American Society of Neuroradiology (ASNR). Through providing resources to support the advancement of neuroradiology, the Foundation's goals are:

- To advance the mission of the American Society of Neuroradiology through philanthropic and marketing efforts.
- To secure the resources necessary to ensure research and educational opportunities for neuroradiologists and members of ASNR.
- To educate and encourage individuals, corporations, and grantors to partner with the Foundation through philanthropic investment strategies.
- To continue its role as a seed funder for neuroradiology research.
