

ANNUAL REPORT 2024

Innovation & Advancement

THE FOUNDATION OF THE ASNR

MESSAGE FROM THE CO-CHAIRS

On behalf of the Board of Trustees, it is a pleasure to report the Foundation of the American Society of Neuroradiology awarded \$720,000 to 9 investigators in fiscal year 2024.

As neuroradiologists and members of ASNR, we play a vital role in fulfilling the Foundation's mission to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes. Your Donations support the innovative work of promising investigators and build a vital pipeline of talent that will carry neuroradiology into the future.

Since 1987, your continued support has allowed the Foundation to grant more than \$9.5 Million to fund 130 members in our society as research investigators. The return on your investment is substantial as the research from our neuroradiology investigators is becoming critical in this healthcare environment. For every \$1 in Foundation grants received, investigators secure an added \$20 in research funding from other sources!

The Foundation partnered with the Alzheimer's Association to provide a joint grant program, the Imaging Research in Alzheimer's and Other Neurodegenerative Diseases Grant. The program funds (3) awards at \$200,000 each.

Thanks to a \$4 Million dollar gift from the Elaine Berger estate, the Foundation endowed the Aldon Mark Berger Fund for Research and Education in Mental Health. The Fund led to the creation of the Aldon Mark Berger Mental Health Imaging Research Grant, awarding \$220,000 for a 2-year term.

Thank you for the opportunity to serve as the Co-Chairs of the Foundation and work collaboratively with a dedicated board of neuroradiologists whose vision and commitment allows us to fulfill our mission.

The success of the mission of the Foundation is inextricably tied to your commitment to the future of neuroradiology. Please consider renewing your financial commitment to the Foundation to invest in this future.

Sincerely,

Laurie Loevner, MD
Co-Chair, The Foundation of the ASNR

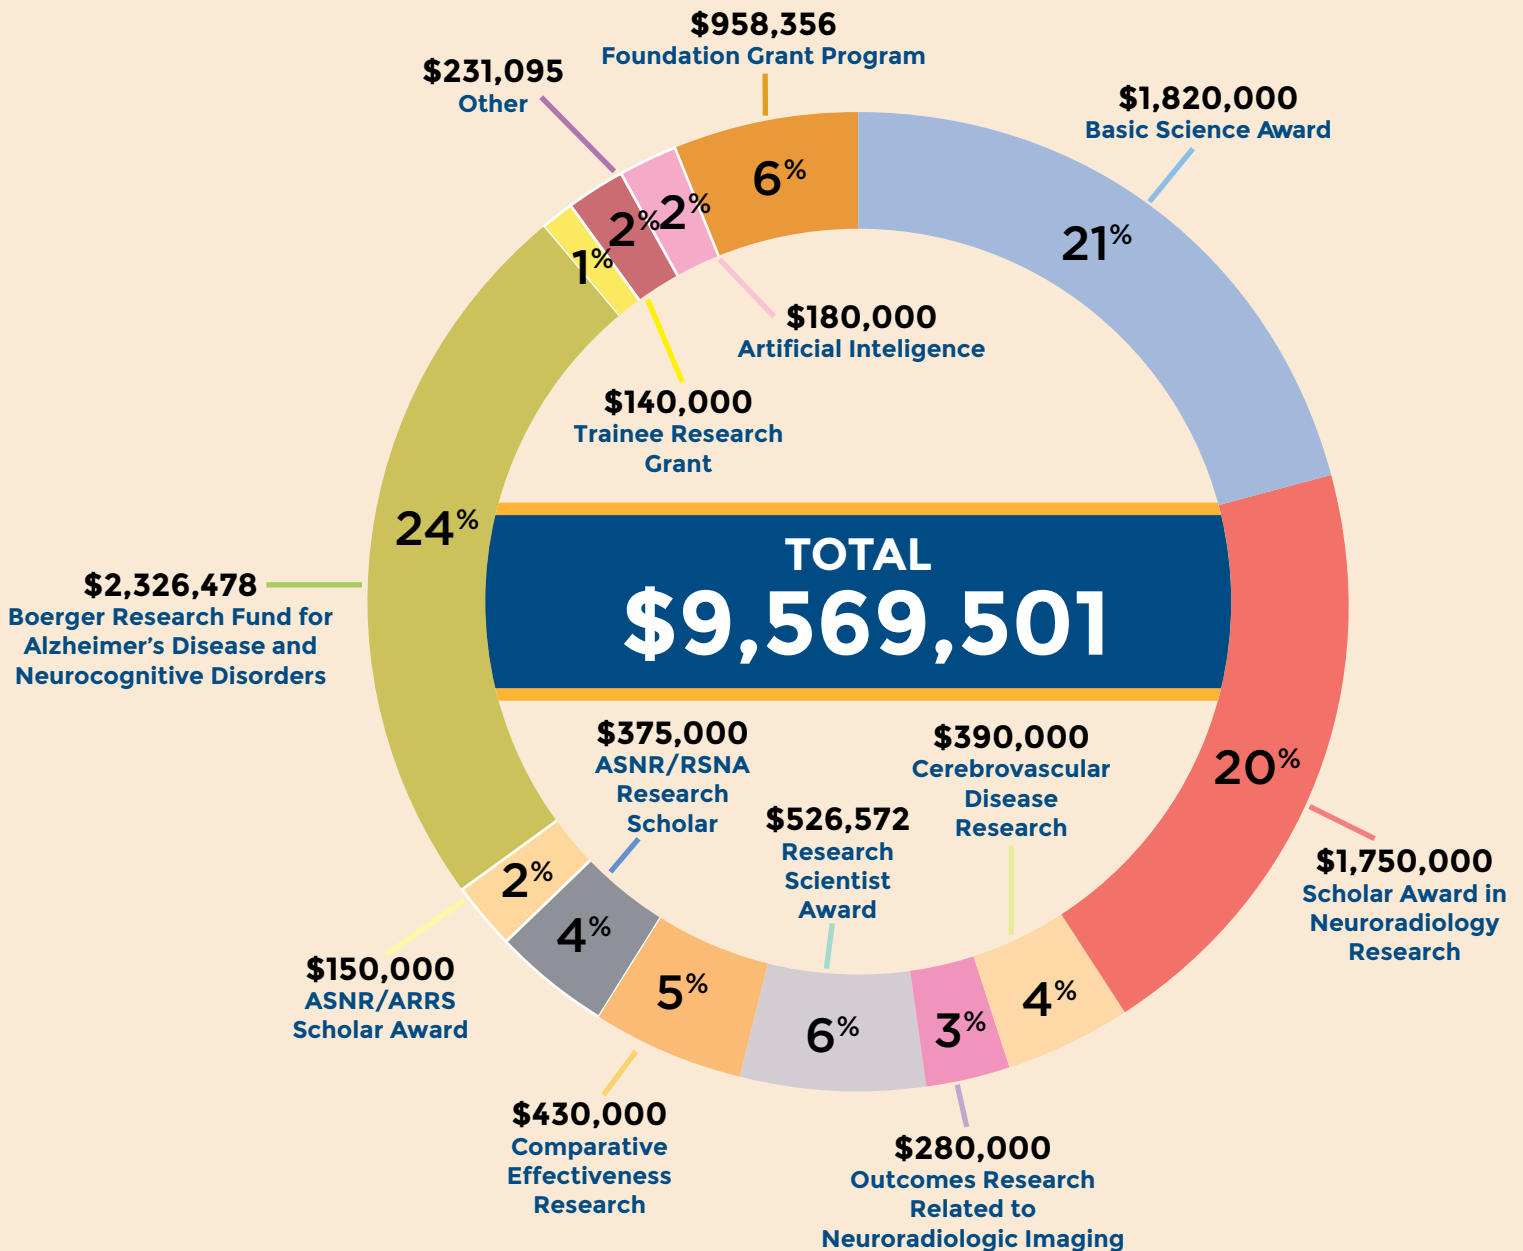

Christopher Hess, MD, PhD
Co-Chair, The Foundation of the ASNR

YOUR DONATIONS AT WORK

RESEARCH SUPPORTED 1987 TO 2024

MAKE A DIFFERENCE

The Foundation of the ASNR relies heavily on support from the neuroradiology community to further our mission to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes. Because your funds support innovative work of promising young investigators, you are building a vital pipeline of talent that will carry the field into the future.

When you make a gift to the Foundation, you send a clear message that you are committed to preserving the integrity of our specialty and that patient care is of utmost importance!

Please donate now to the Foundation of the ASNR at

<https://foundation.asnr.org/page/donate/> (Remember to sign in with login and password)

Foundation Research Fund

Donations made to this fund, the Foundation Innovative Research Fund, support the mission of the Foundation to promote research, education, and innovation in neuroradiology that will advance clinical practice and improve patient outcomes.

David M. Yousem Research Fellow Award

Provides opportunities to increase the number of Research Fellows in neuroradiology who will be able to present their research at the ASNR Annual Meeting. This Award offsets travel expenses for eligible Research Fellows (those engaged in research 75% or more of the time).

THE FOUNDATION
OF THE ASNR

Your Donation to These
Funds Makes
an Impact!

Anne G. Osborn ASNR International Outreach Professor Program

Provides support to bring high-quality neuroradiology education to developing areas of the world. This program recruits and coordinates the travel of ASNR Senior Members to teach around the world.

The Boerger Fund for Alzheimer's Disease and Neurocognitive Disorders

Supports research that advances our understanding of Alzheimer's disease, helps identify new treatment strategies, provides information to improve care for people with dementia, and will further our knowledge of brain health and disease prevention.

Visit foundation.asnr.org/donate to make your donation today!

2024 FOUNDATION OF THE ASNR AWARDS

FOUNDATION GRANT PROGRAM

Marios Georgiadis, PhD

Stanford University School of Medicine

Quantitative Myelin Imaging In AD And Integration With Molecular Biomarkers

"Myelin, which insulates neuronal axons and makes up ~40% of our brain, is strongly involved in Alzheimer's Disease, but its role is unclear, partly due to lack of methods to study it. Our novel myelin-specific imaging method using X-ray scattering can quantify myelin levels and integrity tomographically. With the generous support of the Foundation of the ASNR grant, I am leveraging this to quantify myelin degeneration in the Alzheimer's brain, link it to molecular biomarkers, and translate it to quantitative in vivo MRI imaging. The FASNR grant is essential for this research that can yield new imaging and molecular biomarkers that can drive much-needed novel Alzheimer's Disease diagnosis and treatment strategies."

Hosung Kim, PhD

University of Southern California

Novel multi-modal imaging marker for regional glymphatic flow in humans as a potential early biomarker of Alzheimer's Disease

"I am incredibly grateful for this ASNR Foundation Grant, which supports our efforts to develop RAPiD (Regional Assessment of Perivascular water Diffusivity), a novel MRI-based method for assessing glymphatic function in Alzheimer's disease (AD). By improving our ability to measure regional glymphatic flow, this research aims to identify early imaging markers of AD, paving the way for more precise diagnosis and intervention. The Foundation of the ASNR grant has provided important initial resources for me in advancing our work, including our ISMRM 2025 abstract that presents the fundamental methodology of our technique. I believe this grant will serve as a foundation for future studies translating these findings into clinical applications for improved patient outcomes."

Andreas Rauschecker, MD, PhD

University of California San Francisco

Clinical Utility of AI-Enabled Quantitative Meningioma Monitoring

"I am very grateful to the ASNR Foundation for supporting my early career. This grant jumpstarted a major project to learn more about meningiomas using the latest AI tools, giving us the ability to extract imaging information from all meningiomas we have ever imaged in our healthcare system -- and relating these to outcomes. At the same time, we are making radiologists more efficient by giving them quantitative data and obviating manual measurements. Based on the work that the ASNR Foundation Grant enabled, we were able to submit for a large NIH grant. Ultimately we expect this work to result in data-driven personalized health decisions for patients with brain tumors such as meningiomas."

Vivek Yedavalli, MD, MS

Johns Hopkins University

Utility of MRI Fingerprinting Arterial Spin Labeling in Detection and Characterization of Small Unruptured Arteriovenous Malformations for Treatment Planning

"Currently, there is no treatment consensus for small unruptured intracranial arteriovenous malformations, which continues to be a challenge for our clinicians in managing patients afflicted with this disease. These small AVM patients are at risk of hemorrhage, stroke, seizures, etc, necessitating biomarkers to help with treatment planning to prevent such dire complications. Thanks to the generous support of the Foundation of ASNR, we are able to improve detection and characterization of small AVMs utilizing a novel MRI fingerprinting arterial spin labeling method. I am grateful to the Foundation for providing the support to explore the clinical translation of this unique method where our biomarkers assist with treatment planning for these AVM patients. The funding from the Foundation gives me the time and opportunity to enroll patients prospectively and collect the requisite data for subsequent publication and larger grant opportunities. With the preliminary data we are able to obtain for this investigation, we intend to submit this project as an R01 NIH grant in the future. This grant has been invaluable in my career growth as a clinical and translational physician scientist and I am grateful for the Foundation's continued unwavering support in allowing us to push our science to the next frontier."

FOUNDATION OF THE ASNR AWARDS

TRAINEE RESEARCH GRANT

Abhi Jain, DO, DPT, MEd

University of Southern California

Radiomics Analysis of Hippocampal Subfields in Limbic Predominant Age-related TDP43 Encephalopathy (LATE)

Madhavi Duvvuri, MD, MPhil

University of California San Francisco

Evaluating Cerebral Vasospasm and Ruptured Aneurysm Treatment Efficacy and Outcomes in Black, Hispanic and Female Populations

Yu Sakai, MD

University of Pennsylvania

Imaging biomarkers of complex aortic arch plaque in acute ischemic stroke patients using photon-counting CT

Minerva Zhou, MD

University of California San Francisco

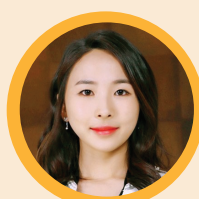

Automated Volumetric Measurements for Early Identification of Fetal Hydrocephalus Requiring Intervention

DAVID M. YOUSEM RESEARCH FELLOW AWARDS

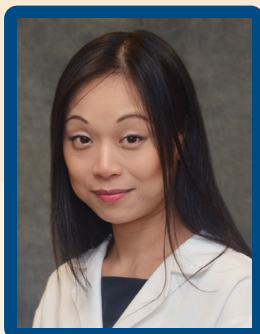

Yongkai Liu, PhD

Stanford University, Palo Alto, California
Predicting Functional Outcomes in Acute Ischemic Stroke from Non-Contrast CT and Clinical Information

Hye Hyeon Moon, MD, PhD

Asan Medical Center, Seoul, South Korea
Prospective Longitudinal Analysis of Imaging-based Spatiotemporal Tumor Habitats in Glioblastoma, IDH-wild type: Implication in Patient Outcome using Multiparametric Physiologic MRI

WOMEN IN NEURORADIOLOGY LEADERSHIP AWARD

Amy Juliano, MD

Massachusetts Eye and Ear/ Massachusetts General Hospital

The Foundation of the American Society of Neuroradiology is the 501 (C) 3 philanthropic arm of the American Society of Neuroradiology (ASNR).

Through providing resources to support the advancement of neuroradiology, the Foundation's goals are:

- To advance the mission of the American Society of Neuroradiology through philanthropic and marketing efforts.
- To secure the resources necessary to ensure research and educational opportunities for neuroradiologists and members of ASNR.
- To educate and encourage individuals, corporations, and grantors to partner with the Foundation through philanthropic investment strategies.
- To continue its role as a seed funder for neuroradiology research.
